Internships Daily Diary(2025-26)

Department Of Artificial Intelligence & Machine Learning Engineering

Program Code : AI5K
Name of the Student : Sanika Dhanaji Chougale
Name of the Mentor (Faculty) : Mrs. Poonam Kumbhar
Name of the Mentor (Industry): Mr. Abhijit Gatade
Enrollment Number : 23213500044

Week	Day & Date	Discussion Topics/Activity	Details of Work Allotted Till Next Session /Corrections Suggested/Faculty Remarks	Signature of Industry Mentor
Week <u>11</u>	Mon, Date <u>11/08/25</u>	• Presented overall project progress to mentor	mentor suggested adding detailed validation steps for results.	 
	Tue, Date <u>12/08/25</u>	• Discussion on preprocessing and data cleaning	mentor advised improving handling of missing values and outliers & prepared report	
	Wed, Date <u>13/08/25</u>	• Showcased update dataset with corrections.	mentor validated improvements, asked for systematic doc-umentation of process.	
	Thu, Date <u>14/08/25</u>	• Reviewed model training phase with mentor	Suggested validating model using pre-decision, recall and f1-score with accuracy	
	Fri, Date <u>15/08/25</u>	• Presented evaluation metrics and results.	mentor validated results, suggested errors analysis of misclassified cases.	
	Sat, Date <u>16/08/25</u>	• final review of week's progress with mentor	mentor validated overall work, appreciated improvement.

Internships Daily Diary (2025-26)

Week No: 11

Day: Monday

Date: 11/08/25

"Presented Overall project progress to mentor".

On Monday, I presented the overall project progress to my mentor. I explained the data collection process, preprocessing steps, and the initial model results. The mentor carefully reviewed the updates and suggested that I should add more detailed validation steps for better reliability of outcome. He emphasized that relying only on raw accuracy is not sufficient to prove the model's performance.

I understood that validation plays a very crucial role in machine learning projects. proper validation ensures that the results are trustworthy and consistent across different datasets.

Week No: 11

Day: Tuesday

Date: 12/08/25

"

Discussion on preprocessing and data cleaning"

On Tuesday, I had a detailed discussion with my mentor regarding preprocessing and data cleaning techniques. I shared my current approach for handling missing values and treating outliers in the dataset.

The mentor advised me to work more systematically on missing values and apply advanced techniques for outlier detection.

He also suggested creating a step-by-step plan for preprocessing so that data quality remains consistent.

From this session, I learned that raw and unprocessed data can mislead the model & directly affects its accuracy.

Internships Daily Diary (2025-26)

Week No: 11

Day: Wednesday

Date: 13/08/25

"Show Cased update dataset with
Corrections"

On wednesday , I presented the upload updated dataset after making the corrections suggested earlier. I demonstrated the improvements in preprocessing and explained how the data was refined . The mentor Carefully reviewed the updated dataset and validated the Corrections . He appreciated the progress but advised me to prepare proper documentation of all preprocessing steps . This would help in maintaining transparency and reproducibility in the project . I understood that Systematic documentation is not Only useful for me but also for other who may work on project.

Week No: 11

Day: Thursday

Date: 14/08/25

"Reviewed Model training phase with mentor"

On day, I reviewed the model training phase with my mentor. I explained which algorithms I used and presented which training accuracy alone is not a sufficient metric to evaluate a model using precision, recall, and F1-Score as well. This helped me understand that different evaluation metrics highlight different aspect of model performance. for example, recall shows how well the model identifies - positives, and precision shows how many of it's positive predictions are correct. f1 - Score balances both.

Internships Daily Diary (2025-26)

Week No: 11

Day: Friday

Date: 15/08/25

" Presented Evaluation metrics and Results".

On friday , I presented the evaluation metrics and results including accuracy, precision, recall, and f1-Score

The mentor validated the result and acknowledged the improvement in evaluation. However, he

suggested that I should perform ~~error~~ analysis of misclassified cases.

By analyzing where and why the model makes mistakes, I can better understand its weakness

This will also help me in fine-tuning the algorithm and improving overall performance.

Day: Saturday

Date: 16/08/25

" Final Review of week's progress
with mentor "

On last day, I had a final review session of the week's progress with my mentor. I summarized all the improvements and changes done during the week including preprocessing, datasets corrections, validation metrics, and error analysis. The mentor validated my overall work and appreciated the improvement in my systematic approach. He also highlighted the importance of continuous learning and applying feedback at every stage.
